The Secretary,
An Coimisiún Pleanála,
64 Marlborough Street,
Dublin 1,
D01 V902.

29 June 2026

An Coimisiún Pleanála Case Number: ABP-319866-24

Re: Response to Request for Further Information as Provided for under Section 292 of the Planning and Development Act 2000 (as amended) to An Coimisiún Pleanála in regard to the North Irish Sea Array Offshore Wind Farm.

Dear Sir / Madam,

In accordance with section 292 of the Planning and Development Act, 2000 (as amended) (the “Planning Act”), on 10th April 2025, An Bord Pleanála, now An Coimisiún Pleanála (ACP), issued a request for further information (RFI) to the Applicant, North Irish Sea Array Windfarm Ltd, in respect of its application under Section 291 of the Planning Act for permission for the North Irish Sea Array (“NISA”) Offshore Wind Farm (Case Reference ABP-319866-24).

The proposed development is an offshore wind farm located off the east coast of Ireland, specifically counties Dublin, Meath and Louth. The onshore infrastructure of the proposed development is located in County Dublin, within the administrative areas of Fingal County Council and Dublin City Council. The proposed development will have an operational life of 35 years.

This RFI requested the Applicant to:

- Respond to the items raised in the RFI (Item Nos. 1 to 21); and
- Respond to the submissions and observations received as part of the statutory consultation process, including from the public, statutory bodies, transboundary consultees and the coastal planning authorities.

While a response was requested to be submitted to ACP within nine months from the date of the letter (i.e. by 19th January 2026), the Applicant subsequently requested an extension to that timeline in correspondence dated 16th October 2025. The extension was granted by ACP, extending the timeline for a response to 14th August 2026.

The documentation included herein comprises the Applicant’s detailed response to the RFI issued by ACP on 10th April 2025. It is submitted that all matters raised in the RFI have been addressed in full and that all required further information has been provided. The RFI response fully satisfies the requirements of the National Marine Planning

Framework (NMPF) and is completed in accordance with all national and European legislation and guidance.

Furthermore, the updated assessment concludes that there will be no adverse effect on the integrity of any Natura 2000 site, whether from the project alone or in combination with any other plan or project, for all receptors.

Since the submission of the 2024 EIAR, the context underpinning the need for the proposed development has become more acute. Updated policy and market evidence further reinforce that need. Ireland has reaffirmed its offshore wind ambitions through Climate Action Plan 2025 and the Hamburg Declaration, while recent EPA projections indicate that, under both existing measures and with additional measures scenarios, Ireland is expected to remain substantially short of its 2030 national emissions reduction target.

Recent evidence also shows that the need for the proposed development extends beyond climate compliance alone. Ireland remains heavily dependent on imported energy and exposed to international market and geopolitical volatility, underlining the importance of secure, domestically generated renewable electricity. Continued renewable deployment is also associated with significant consumer savings and wider socio-economic benefits, including support for employment, investment, and supply-chain development.

Appendix 1 provides the schedule of documents and digital data files. Included in the RFI response are;

- An RFI Response report tabulating all responses to the RFI;
- A Submissions and Observation Response report (with responses to submissions made by members of the public and non-governmental organisations, prescribed bodies and coastal authorities as well as transboundary consultees and other bodies);
- Addendum to the Environmental Impact Assessment Report (EIAR);
- Addendum to the Supporting Information: Screening for Appropriate Assessment (SISAA);
- Addendum to the Natura Impact Statement (NIS);
- Addendum to the Planning Report; and
- Updates to a number of the 2024 planning application drawings.
- A series of other updated documents and digital data files.

As requested by ACP in their correspondence on 10th April 2025, 2 no. hard copies and 1 no. electronic copy (USB stick) of the RFI response documentation, as detailed above, have been enclosed herewith.

All documents, plans and particulars in addition to digital files have been uploaded to the NISA Project website (www.northirishsearraysid.ie).

Appendix 1

Schedule of Documents

1. Response to Request for Further Information report.
2. Response to Response to Submissions and Observations report.
3. Addendum to the Planning Report.
4. Addendum to the Planning Drawings. These are listed below:

Drawing Title	Drawing Number
Grid Facility Proposed Layout Sheet 1	281240_ARP_ONS_GF_DR_PL_1001
Grid Facility Proposed Layout Sheet 2	281240_ARP_ONS_GF_DR_PL_1002
Grid Facility Compensation Substation GIS Building Elevations	281240_ARP_ONS_GF_DR_PL_1007
Grid Facility Bremore Substation GIS Building Elevations	281240_ARP_ONS_GF_DR_PL_1008
Grid Facility Proposed Drainage & Water Sheet 1	281240_ARP_ONS_GF_DR_CD_1200
Grid Facility Proposed Drainage & Water Sheet 2	281240_ARP_ONS_GF_DR_CD_1201
Grid Facility Compensation Substation Compound Elevations	281240_ARP_ONS_GF_DR_BS_2000
Grid Facility Bremore Substation Compound Elevations	281240_ARP_ONS_GF_DR_BS_2001
Grid Facility Landscape Plan	281240_MCR_ONS_GF_DR_YE_1010
Proposed Offshore Infrastructure Option 1	281240-ARP-OFS-OA-DR-PL-1010
Proposed Offshore Infrastructure Option 2	281240-ARP-OFS-OA-DR-PL-1011
Proposed Project Option 1 WTG and Jacket Foundation	281240-NISA-OFS-OA-DR-PL-2001
Proposed Project Option 2 WTG and Jacket Foundation	281240-NISA-OFS-OA-DR-PL-2003
Proposed Project Option 1 and Option 2 Front Elevation Comparison	281240-NISA-OFS-QA-DR-PL-2005
